

# JEWELRY DESIGNING 3D MODELLING

BRING YOUR IDEA TO LIFE

START >>>

# Jewelry Designing

We offer the greatest jewelry design, 3D modeling, and rendering services available anywhere on the world. Our expertise extends to the use of haut-relief, bas-relief, and digital sculpting components in jewelry design to create pieces that are distinctive, robust, and striking.

## Sketch to Jewellery CAD

CAD software is used to maximize a designer's productivity, enhance design quality and dimensional accuracy, and develop a database for production

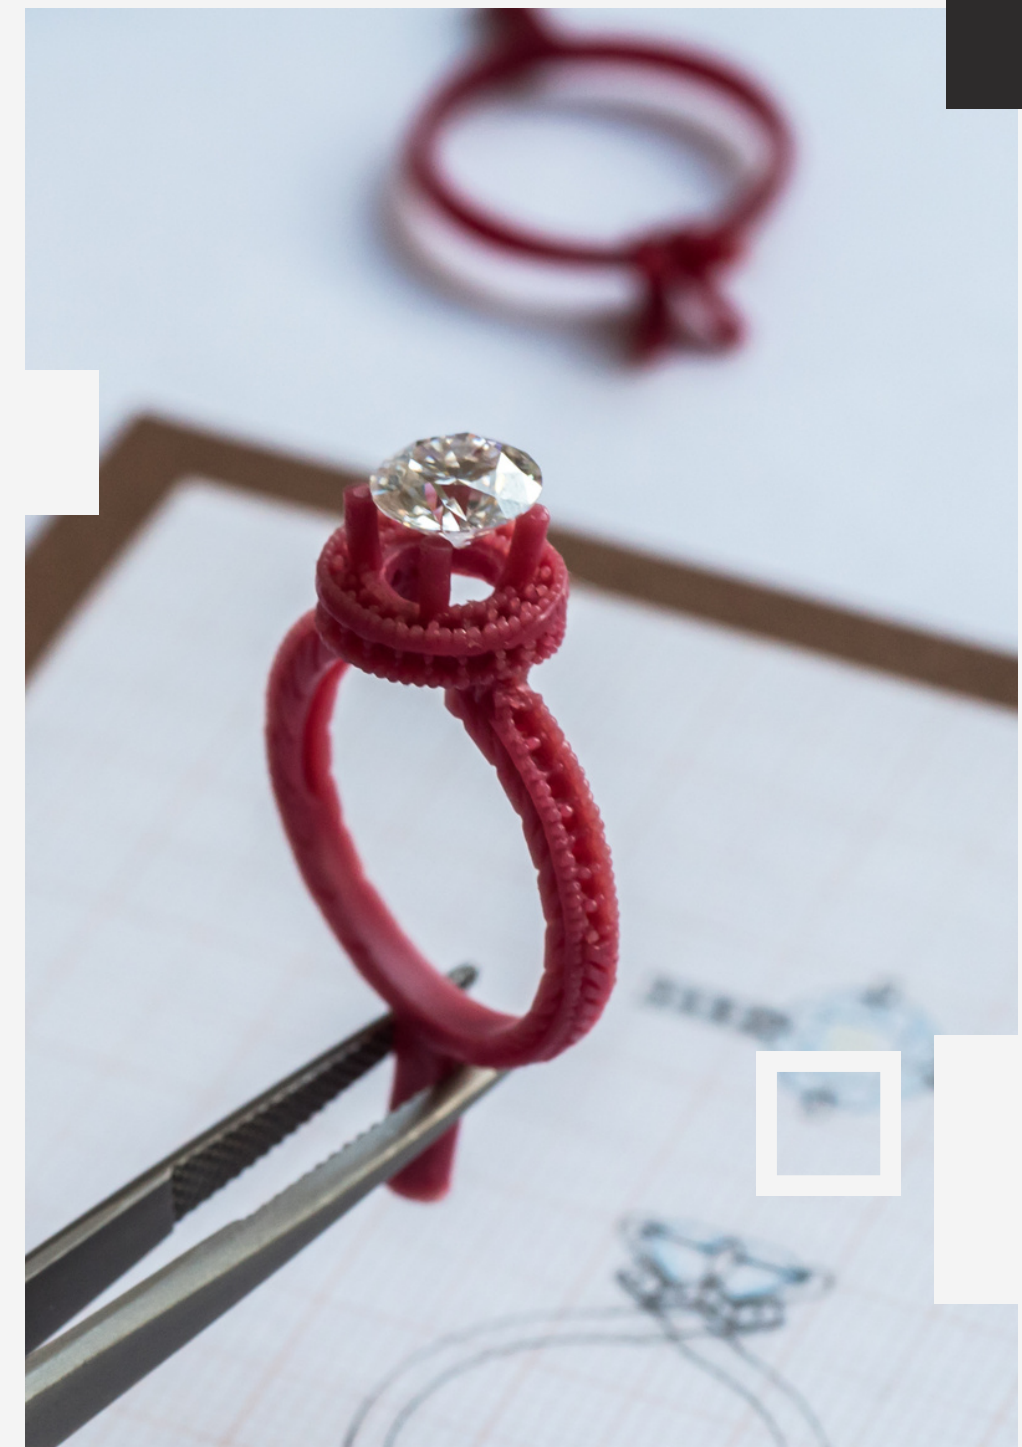

## Jewelry CAM

The CAD design file is then transmitted to the 3D Rapid Prototype system once it is complete. The Direct Light Projection Technology concept is used in this system

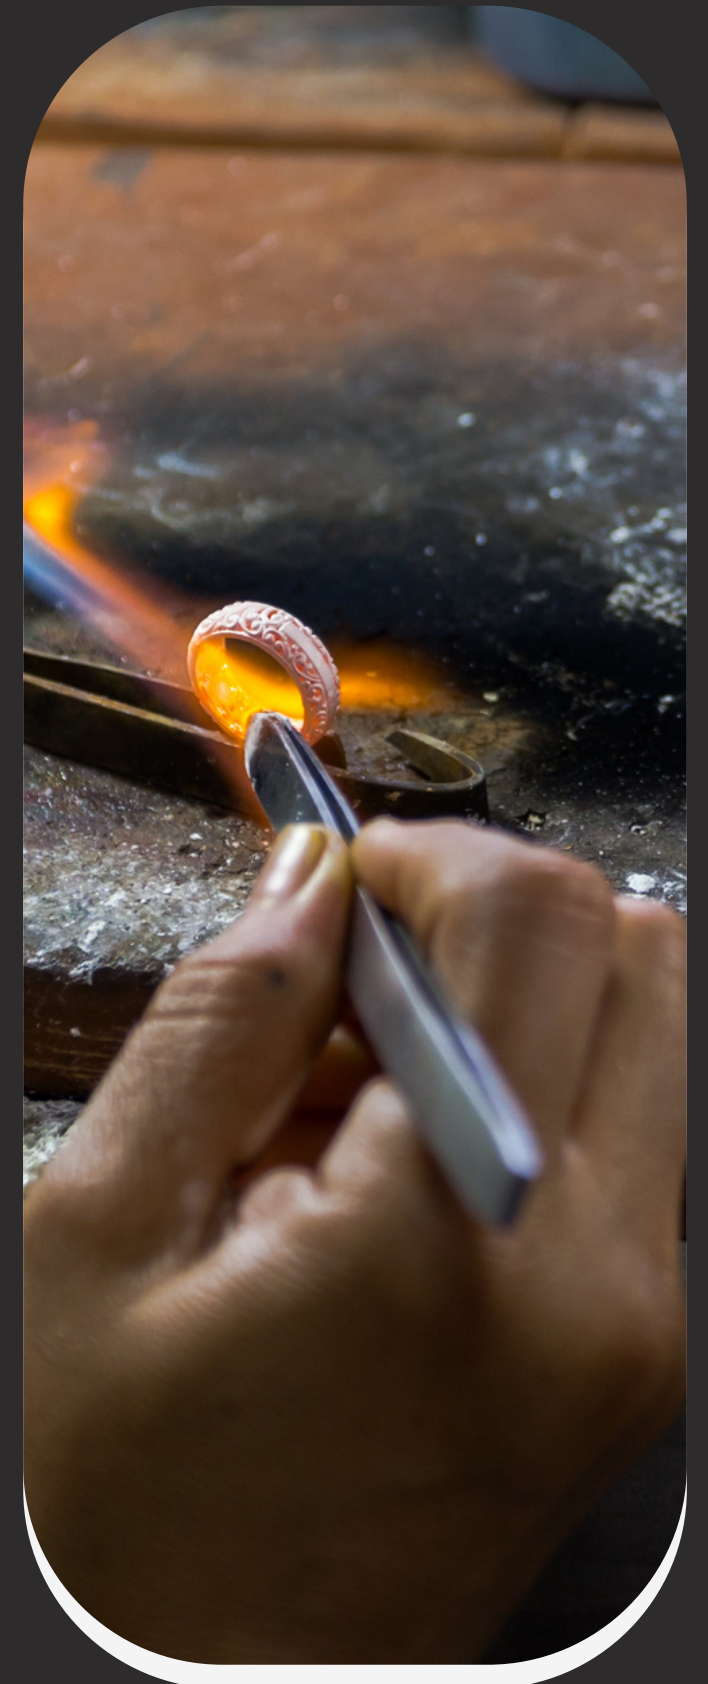

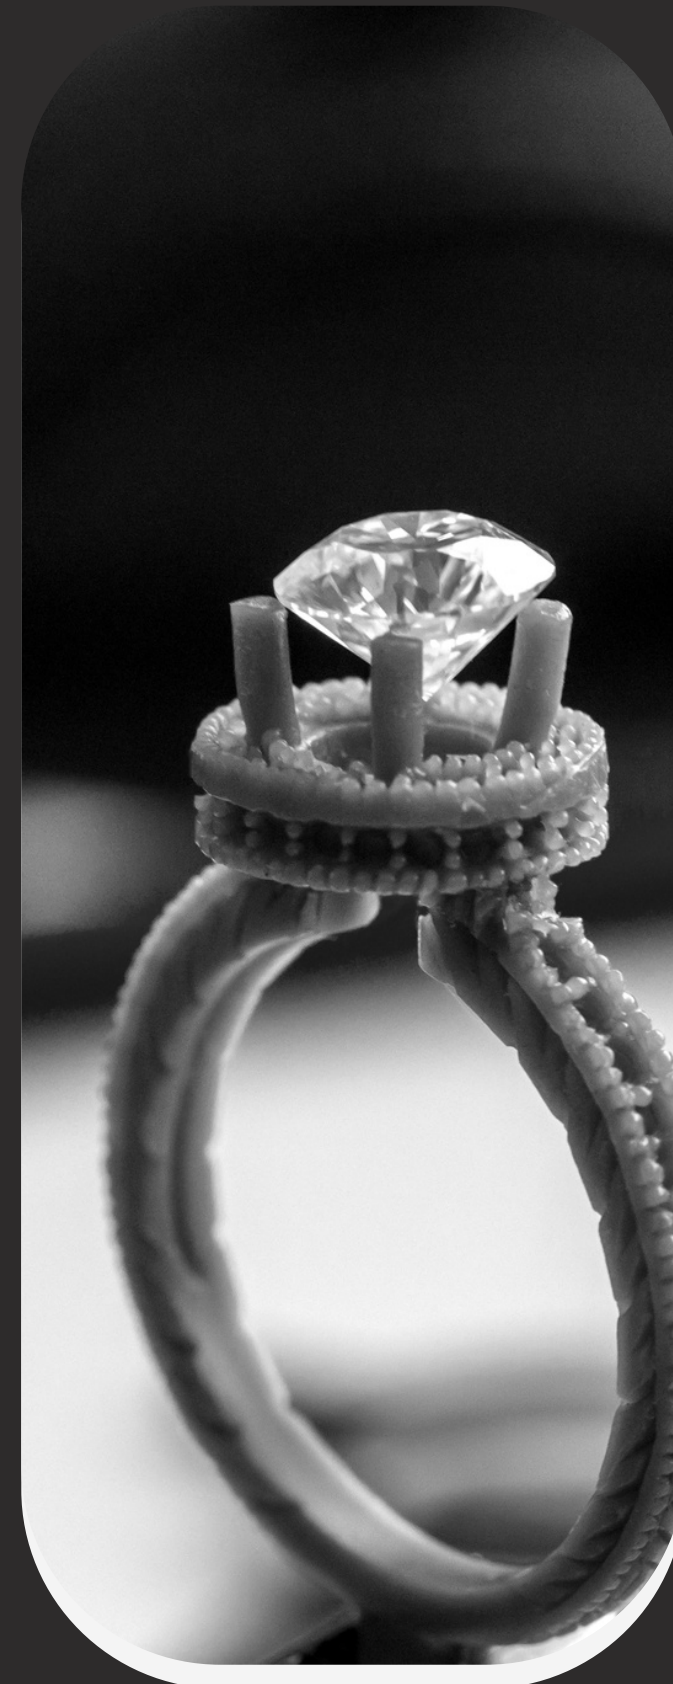

## Jewelry Rendering

Your wants and requirements will be met by the emergence of 3D picture and video renderings.

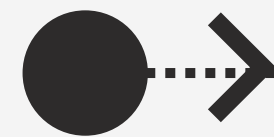

# Custom Jewelry Designing

You don't need to be an artist to develop personalized jewelry designs with us. Our finest jewelry designers will work directly with you to help you produce 3D jewelry design concepts.

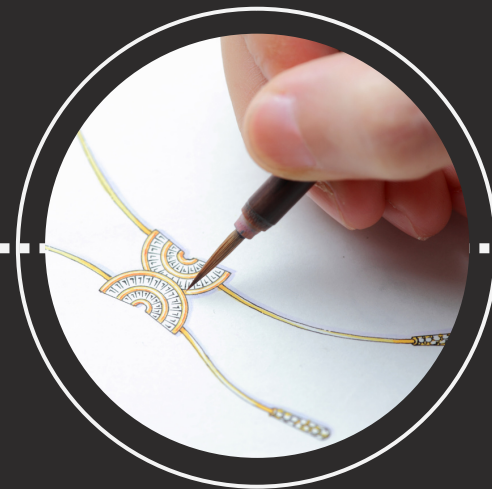

# Release Timeline

Our jewelry designers would be delighted to assist you in designing your ideal jewelry. We'll walk you through the creation process, starting with your ideas. Our designers are with you every step of the journey, from a rough sketch to a 3D model to a gorgeous handcrafted jewelry.

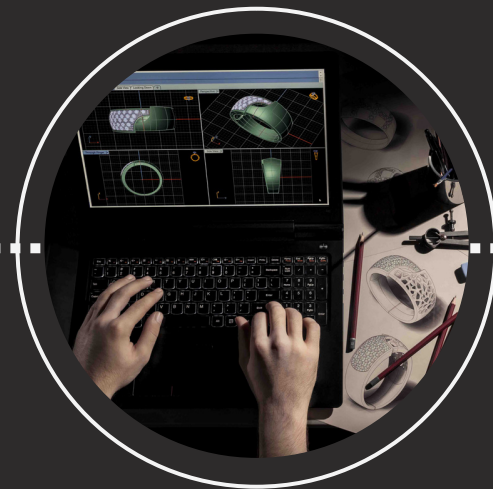

## Sketching

### Step 1

Every item of jewelry begins with a simple concept, followed by a simple CAD design.

## 3d Modelling

### Step 2

The first step toward turning your vision into reality is to create a professional jewelry 3D model.

## Prototype

### Step 3

We use computer-aided design (CAD) software tools to develop a unique jewelry prototype

## Production

### Step 4

The goal is to make the metal shine and be free of blemishes, giving it a high-end appearance.

# Bring Your Idea to Life

Looking for the perfect gift for a loved one? We can help you create your own custom jewelry.

Our designers will walk you through the creation process from rough sketch to 3D model to handcrafted jewelry.
