

CLEAN ROOM

As an ISO 13485 certified company, PROGRESS is specialised in the manufacturing of silicone technical parts for the medical and pharmaceutical industries.

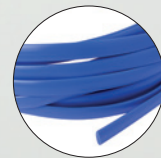

We are able to supply silicone parts to all manufacturers of medical devices. We only use materials that meet USP and European Pharmacopoeia specifications.

Implantable grade for short term and long term applications. (Restricted and unestrict tool).

PROGRESS manufactures its products to the most exacting requirements, in ISO 7 and ISO 8 controlled atmospheres. We also ensure quality control through particle and microbiological inspection carried out by an external laboratory.

PROGRESS - AN EFFICIENT AND RELIABLE PARTNER enabling you to develop and execute your projects requiring silicone devices.

- Tubes, moulded plastic to drawings
- Catheters, septums
- Membranes, valves
- Gastric rings
- All types of implantable silicones for short-term and long-term applications.

Production means

600m² cleanroom equipped with a centralised technical management system (CTM) including:

- 250m² of ISO 8 cleanrooms
- 350m² of ISO 7 cleanrooms
- 1 internal screw mixer
- 2 extrusion lines
- 2 rubber injection machines
- 3 LSR injection machines
- 3 post curing oven with forced air extraction system.

Silicone, our core business
